MONEY, STOCKS AND BONDS.

A Little More Animation in Wall Street-Heavy Dealings in Sugar Trust. NEW YORK, July 24 .- Money on call was easy, ranging from 312 to 412 per cent., the last loan being made at 4 per cent.,

closing offered at 4 per cent. Prime mercantile paper 5@612 per cent. Sterling exchange quiet and steady at \$4.8434 for sixty-day bills and \$4.8834 for

The total sales of stocks to-day were 158,-688 shares, including the following: Atchison, 5,150; St. Paul, 6,600; Union Pacific, 3,500.

The stock market showed a little more animation to-day in spots, but, as yesterday, the attention was concentrated upon Sugar Refineries, and the large dealings in that stock were sufficient to bring the transactions in the unlisted department again up above those in the regular list. The announcement that a suit had been begun by the trustees for the winding up of the Trust caused the expectation that the stock would sell materially higher to-day and 80 was the figure expected. There were offerings at that price but no bids over 7814. Sales were effected at 7912 when the traders, seeing that there was plenty of stock for sale by parties waiting for a market, went in to take the market away from them, and a sharp and sudden decline to 7758 took place. The insiders supported the stock at this point, however, and later in the day there was renewed buying for the long account, several influential brokers being loud in their expressions of opinion of the further apprecia-tion of the certificates. The forenoon's trading was marked by extreme dullness and stagnation in all of the regular list, with the single exception of New England, but later there was a manifestation of confidence, and buying was renewed all along the line with the effect of more animation and slightly higher prices for all the active shares. The feeling in the street during the past few days has distinctly grown more hopeful, notwithstanding the intense dullness and the slight hope of any improvement in that respect for some time to come. The belief is general that the new departure of the Secretary of the Treasury will meet with a full response, and that he will be able to get a liberal amount of bonds at such prices as he will be willing to pay. To-day was appointed as the first one upon which to receive tenders, and the acceptances were large, which was responded to in the afternoon's dealings with a general rise all along the line and more animation. For the time being the market certainly showed a tendency to broaden. The afternoon rise was continued well into the last hour when realizations compelled some reaction, though only in Sugar and New England was there any material set-back. The market, however, closed barely steady on the reaction, but generally at small fractions better than the opening figures. The loss in New England was 178 per cent., but Citizens' Gas rose 112, but other changes are for small fractions

Railroad bonds were very quiet, though there were a larger number of issues traded in than usual of late. The important changes in quotations, however, are as usual in the inactive bonds, and the move-ments among those which are traded in from day to day are in almost all cases in-

Government bonds were quiet but strong. State bonds were neglected. Closing quo-

Wheat, Corn and Oats All Higher-Slight

Advance in Hog Products. CHICAGO, July 24.-A fair speculative business was transacted in wheat, but it was confined to a considerable extent to local professional traders. The opening was about 3sc higher, and prices steadily advanced under a fair demand, light offerings and the general character of the influences 134c more, ruled firm, and the closing was about 2c higher than yesterday's closing figures. Cable advices were favorable to holders. The advance in corn had a strengthening effect on wheat. Corn was active and rather unsettled, price changes being frequent. The sharp advance was attributed largely to bad crop reports. The market opened excited at an advance of 380 12c over the closing prices of yesterday, was firm for a time, selling up 4@3sc, became easier, declining 3sc, again ruled stronger, selling up 12@5sc, reacted 3sc, again advanced 14@3sc, just before the close, and closed 34@10 better than yesterday. Oats active but unsettled. The feeling was rather bullish, in sympathy with corn. First sales were at s@3se advance, and a further appreciation of 1800 14c was recorded. The buige brought out free selling, and despite the advance in wheat and corn prices receded 4c, and the market closed quiet, but at 4 @ 12c advance over yesterday. In mess pork more was doing. Prices showed little change, but deliveries were quiet at 20@25c higher. Prices, however, were not fully maintained. A fairly active trade in lard was reported. Prices advanced .0212@.05c on the near and .05@.0712c on January de-livery, and the appreciation was moder-ately well supported. The short-rib mar-ket advanced .05@.0712c, and the advance was fairly well maintained. The leading futures ranged as follows:

INDIANAPOLIS MARKETS.

The Local Situation Presents No New Feat ures-Prices, as a Rule, Firm.

INDIANAPOLIS, July 24. In all departments, as for some days past, a summer quietude has been noticeable. yet it is not so pronounced in its character as usual in July, and with this firm prices prevail all along the line. The continued dry weather begins to effect the receipts of fruits and vegetables, and prices range higher. Poultry, on a decreasing Eastern demand, has taken on an easier tone. Eggs firm, and the same is true of really choice butter. All articles in the grocery line carry a firm tone. Packers still decline to fix their scale of prices on canned goods. The flour market is more active; prices unchanged, but indications are to an early improvement. The hide market continues active at at strong prices, and the leather market is taking on a much stronger tone. Other markets are featureless.

The local market presents no new features.

All cereals are in active demand, and prices rule firm. Tack bids to-day ranged as follows:

Soil and Drainage.

Farm and Fireside The heaviest rains of the season, thus far, and I hope, altogether, came early in June. Just as the ground got dry enough for working, and we thought we could plant corn and beans, etc., this work had to be postponed for another week or more on account of another transformation of land into swamps and lakes. This calls to mind. more forcibly than ever before, the great disadvantages of the clay loam with im-pervious subsoil when compared with the sandy loam to which I had been used in New Jersey. There garden operations need be interrupted only during actual rainy spells, and may be resumed almost im-mediately on the cessation of the raina week, after heavy rains, before the soil is again in shape for tillage. Part of my garden has been plowed and harrowed three times this season, and the last rains have again packed it down as solid as ever. Another part has been plowed twice, and will need another plowing and several harrowings before it will be in order for planting. Under these circumstances. have not been able to plant the 2,000 bushel crop; and one-sixteenth of an acre has been planted fully two weeks, deal of what was planted was planted in vet show an enormous crop of fine onions and prove that onion-growing can be made to pay well. Much of this planting, also,

was done on experimental lines, and will undenbtedly bring out some valuable new On a patch of one-eighth of an acre seed was drilled in on April 17. This piece is well provided with tile drains, and is quite a contrast with patches even heavier fertilized, but less thoroughly underdrained. It is an object lesson of the value of thorough drainage worth observing and remembering. The same labor expended on getting the other patch mentioned in shape for planting—three times plowing, harrowing with disk harrow, smoothing harrow. Meeker harrow, for ever so long—would have gone quite a little ways toward putting in drains and improving the land permanently, so that a single plowing would answer better than the three. Lack of proper drainage, in seasons like this, is a rather costly thing.

Never seald your milk utensils before washing, as scalding will make the caseous matter adhere in an insoluble form that can be removed only by scraping and scouring. First rinse the article in cold water thoroughly, then wash in tepid water that the hand can be kept in, using a little alkali, and when well washed and rinsed, scald with clean boiling water, and set it aside so that it will drain dry; don't wipe it, as the article is likely to be cleaner than the cloth. If it is a matter of necessity to wipe some articles, use a perfectly clean cloth that nothing else has been wiped on.

There is no reason why women should tire themselves in squeezing juice from fruit for jelly or in stoning cherries when there are several patent processes for doing this work with perfect success, enabling the worker to go through preserving time with unstained hands and unexhausted patience. There are enough necessary things to do in a household which cannot be done by machinery. Housekeepers should take advantage of every chance that offers for genuine help in their work.

Lime is recommended for use in case of mildew in cucumbers and diseases among potatoes. Powder the lime and shake it through a sieve, being careful to distribute it thoroughly.

THE

DAILY, SUNDAY and WEEKLY

The Most Complete Newspaper in all Departments in the State of Indiana.

No newspaper in the West is more widely or more favorably known than the Indianapolis Journal: By the display of enterprise and strict attention to the wants of the reading public, during the great campaign of 1888, it has taken a leading position among the most prominent journals of the country, and is certainly among the best. Among the newspapers of the State it is pre-eminently the best, and Indiana readers can \$100.00 nowhere else find what they want in the way of State and local news. It circulates largely in every county in Indiana. and has correspondents in every town and village of importance. Its market reports are prepared with the greatest care possible, and no pains or expense are spared to make them accurate and absolutely reliable. It is the only newspaper in the State owning and publishing all the news furnished by the two great press associations (the Western Associated Press and the United Press), in addition to which it furnishes an abundance of special service from all the principal cities of the country. It has been, and will in future be, the aim of the publishers to make the Indianap-OLIS JOURNAL a perfect and complete newspaper, deficient in no department or particular.
